LIUTEX2026

INTERNATIONAL CONFERENCE ON

LIUTEX THEORY AND APPLICATIONS

IN VORTEX IDENTIFICATION AND VORTEX DYNAMICS

DATE
December 14-16, 2026

VENUE
Outram, Singapore

OFFICIAL 2026 EDITION

LIUTEX VORTEX SUMMIT 2026

Conference Overview

The International Conference on Liutex Theory and Applications is the premier gathering for experts in vortex identification. This summit bridges the gap between pure mathematics and practical engineering.

Core Objectives

Target Audience

Aerospace & Mechanical Engineers

LIUTEX2026

- Advance the knowledge of Liutex-based rotation definitions.
- Solve the "shear contamination" problem in vortex identification.
- Promote cross-disciplinary research in CFD and fluid mechanics.
- Implement AI-driven vortex detection frameworks.

Computational Fluid Dynamics (CFD) Researchers

Atmospheric Scientists & Meteorologists

Applied Mathematicians & Physicists

Key Themes for 2026

- Liutex Fundamentals
- Omega Method
- Turbulence Structure Analysis
- Machined Learning in Fluids
- Aerospace Application
- Vortex Dynamics

LIUTEX2026

Advancing the science of Liutex-based vortex identification to unlock deeper insights into turbulence and rotational flow dynamics.
